

2020 URFC THP Monitoring Report

Timber Harvesting

Timber Harvest Plan	Harvest Volume (MBF)	Harvest Acres	Silviculture
Pokemon	738	137	Selection
Total	738	137	

Sediment Source In 2020, 46 Erosion Control Plan (ECP) sites were monitored on the Usal Redwood Forest Company Property. All of the sites were performing as described in the ECP, although three sites were identified as needing additional work to further prevent potential erosion. One was related to settling in the outside road fill; the other two were related to trespass issues during the winter. One site has already been addressed and the other two will be address in the summer of 2021.
